

ALEXANDRA HOCKETT

Next.js Full Stack Developer | React & TypeScript | AI Integration

alexandra@ahockett.com • Sintra, Portugal • Open to Remote & Hybrid • alexandrahockett.com • github.com/AlexandraHockett • linkedin.com/in/alexandra-hockett

ABOUT ME

Before becoming a developer, I managed teams and businesses in hospitality in Portugal and the UK for over eight years. I moved into tech in 2021, after taking a free SheCodes class and finding out I was going to become a mother. That's when I realised how much web development fascinated me, and how I could change fields for this new chapter of my life.

That earlier experience shows in my work: I understand the business behind the request, not just the technical spec. I've managed budgets, people and difficult clients, and that changes how I communicate and how I set priorities on every website, adapting everything to work well both for the user (UI and UX) and for the site's administrator.

I work mainly with Next.js 15 and TypeScript. I built and launched my own SaaS in production, integrating several AI models, and I use Claude Code daily to build faster without lowering quality.

TECHNICAL SKILLS

Core stack: Next.js 15 (App Router, Server Components, Server Actions, API Routes) • React 19 • TypeScript • JavaScript ES6+

AI & integrations: Multi-API Integration (OpenAI, Google, Runway, FAL.ai, ElevenLabs) • Claude Agent SDK • Streaming LLM UIs • Stripe • Supabase (Auth, Storage, RLS) • Firebase

Frontend: React Hooks • Context API • GSAP • Framer Motion • Responsive Design • Mobile-First • PWA • Accessibility (WCAG)

Styling: Tailwind CSS v4 • CSS Modules • Sass/SCSS • CSS Grid • Flexbox

Backend & data: Prisma ORM • PostgreSQL (schema design, query optimisation) • RESTful APIs • SSR • SSG • Node.js

Performance & SEO: Core Web Vitals • Lazy Loading • Bundle Optimisation • Technical SEO • Lighthouse

Workflow & DevOps: Git • GitHub • CI/CD pipelines (GitHub + Vercel) • Agile iterative delivery

Languages: English (Fluent - UK) • Portuguese (Native)

COMMERCIAL PROJECTS

Code AI Studio - Personal SaaS | codeaistudio.com | Next.js 15, TypeScript, Tailwind CSS v4, Prisma, PostgreSQL

Started as a personal tool to make my own work easier and grew into a full commercial platform used by paying customers. Code AI Studio integrates a wide range of AI models for image, video, avatar generation, and more, with credits, billing and an admin panel, built to stay reliable even when individual AI providers go down or slow down.

Coutale Portugal - PT Client | coutaleportugal.vercel.app/pt (temporary deployment) | Next.js 15, TypeScript, Supabase, Firebase, Stripe, NextAuth

The most interesting part was building a custom product-personalisation tool from scratch, customers design their own engravings directly on the site. I also built a separate dashboard for the workshop team with different access levels for staff and the owner.

Forma - Personal PWA | forma-aiapp.vercel.app | Next.js 15, TypeScript, Tailwind CSS v4, Prisma, PostgreSQL, Gemini 2.5 Flash, PWA, Recharts

A fitness app my own family uses daily. AI builds each person's workout plan and adapts it in real time as the session happens: swapping exercises, adjusting for injuries, updating plans on the fly.

PROFESSIONAL EXPERIENCE

Next.js Full Stack Developer & Freelancer

Nov 2024 - Present

AHockett - Portugal (Remote)

Building commercial web applications for clients in Portugal and the UK, alongside my own SaaS products. Projects range from full e-commerce builds to AI-integrated platforms.

Curricular Internship - Educational Technology Programmer

Sep - Nov 2024

Happy Code Portugal, Lisbon

Developed a complete pedagogical guide for a React.js bootcamp aimed at teachers without a technical background, including lesson scripts, CodeSandbox exercises, graduated challenges, and step-by-step solutions.

Supervisor / Manager

Oct 2017 - May 2023

Pastelaria Dom Sabor, Portugal

Ran the day-to-day operations of the business - team management, payroll, stock control, and customer service. Redesigned internal workflows that led to a 25% improvement in both productivity and customer retention.

Manager in Training

Feb - May 2017

*Domino's, United Kingdom***Team Leader / Supervisor**
